

The Most Economical and Safest Way to Pay Your Bills

Today, documents with value require security, so originals can be authenticated easily.

Whether tracking your household payments or managing your company's payroll, **adhering to industry standards in security printing is incredibly important.**

Cheque Fraud: A Serious Threat that Affects Us All

Did you know that fraud causes **billions of dollars in losses to businesses every year?**

Cheques are often targeted by counterfeiters, because of their widespread use. But they are still the most economical and secure method of payment. Plus, cheques help you personalize and promote your brand.

World-Class Cheque Printing Processes

Rainbow Printing Ltd. is a **certified Canadian Payments Association printer**, with our own ID number: 1025. We are the **only licensed cheque printer in Atlantic Canada.**

This means we are always up-to-date on the latest standards and regulations for printing secure, tamper-resistant cheques.

Our cheques are locally **manufactured and printed** in our shop in **New Brunswick.**

Fluorescent Fibres

Research & Development

Rainbow Printing Ltd. ensures that all security printing from our facilities are fortified by the best anti-fraud printing advancements.

We are continually doing research and development to ensure that cutting-edge technologies are integrated into your design.

With current advances in cheque security, Rainbow Printing Ltd.'s cheques help eliminate cheque fraud, with optional advanced security features.

Standard Laser Cheque Color Options

Custom colors are available upon request.

State-of-the-art Security Features

We provide a suite of advanced, layered cheque printing solutions to help **protect you and prevent the cost and hassle that comes with fraud.** These twelve security features are included in all of our cheques.

Paper Security Features (Included in all cheque paper during manufacturing)

- 1 UV Dull Paper**
 - Manufactured by a certified Security Cheque Paper Mill
- 2 Authentic Genuine Multi-Tone Watermarks**
 - Embedded directly into the paper fibres, and is only sold to approved security printers
- 3 Ghost Reactor Invisible Taggant**
 - Real DNA is manufactured into paper that can be verified with special equipment
- 4 Chemically Reactive Paper**
 - Five families of chemical reactive solvents identify stains, showing evidence of chemical altering
- 5 Fluorescent Fibres**
 - Only visible under ultraviolet light and can not be photocopied

- 6 Chemical Toner Anchorage**
 - An advanced coating on the paper that maximizes the adhesion of the laser toner to the paper fibre surface to prevent tampering

Standard Security Features Included on Front of Cheque

- 7 Micro Security Printing**
 - Very small print, readable under magnification and difficult to replicate
- 8 Security Pantograph Pattern**
 - Intricate screens designed to not copy or scan well
- 9 Micro Encoding**
 - Cheques are numbered using special characters and magnetic toner, verified in-house via cheque verification machine

Standard Security Features Included on Back of Cheque

- 10 Custom Security Ink**
 - Drop out pattern with covert security ink
- 11 Warning Box**
 - Explains document's security features to alert handlers and deter forgery
- 12 "Padlock"**
 - Representing special security features that exceed bank requirements

Advanced Security for Additional Protection

Security Void Pantograph Pattern

- Intricate screens designed to not copy or scan well, and show 'Void' if copied in color and black and white

SCS-Blockout

- Pattern that makes duplication or color copying nearly impossible

Additional UV Security Toner Anchorage

- Bonds laser toner to paper fibre to prevent its removal

Thermochromic Ink

- Sensitive to temperature and turns colourless when rubbed or photocopied, before reverting to original state

Coin Reactive Ink

- Colourless ink shows instant authenticity verification when rubbed with a coin

Chemical Sensitive and Erasable Inks Available
